

# We need blood donors!

## Who can donate?

### Dogs:

- Between 1 and 7 years old with a good temperament
- Over 50 pounds and a healthy body weight
- Not on any chronic medications, never bred, and never previously received a blood transfusion.
- Current on vaccines, preferably already on flea and tick prevention as well as heartworm preventative.

### Cats:

- Between 1 and 8 years old with a good temperament and indoor only.
- Over 10 pounds and a healthy body weight.
- Not on any chronic medications, never bred, never previously received a blood transfusion, and not around other cats positive for FELV or FIV.
- Current on vaccines, preferably already on flea and tick prevention.

**If your pet fits this criteria and you are able to commit to 2 years in our program, contact us so we can schedule the initial screening appointment!**

## Why should my pet donate?

### Each donor receives:

- A complimentary exam annually and vaccines if necessary
- Complimentary comprehensive labwork annually
- Flea and tick prevention and heartworm prevention at no cost to you

**Estimated value of up to \$1,000**

Call the blood donor program at VSCOT:
